MONTHLY REPORT

25X1

PAR 214

30 June 65

SUBJECT: Roller Transport Processor (12-Inch)

TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

DISCUSSION

2. Mechanical checkout of the processor at the contractor's facility is continuing. Sensitometric checkout was started during the middle of June 65. Negative mode checkout is complete with good results.

PLANNED ACTIVITY

3. Complete testing at contractor's facility and ship to arrive at customer's facility by Thursday, 5 August 65; installation to start on Monday, 11 August 65.

Declass Review by NGA.
